(Abstract)

The present invention relates to compounds of the formula:

$$CH_{2} - O - R_{2}$$
 $CH_{3} C = O$
 $CH_{3} X_{1}$
 $CH_{3} C = O$
 $CH_{3} CH_{3} CH_{3}$
 $CH_{3} CH_{3} CH_{3}$
 $CH_{4} CH_{5} CH_{5}$
 $CH_{5} CH_{5} CH_{5}$

in which X_1 and X_2 correspond to H or F without distinction; R_1 represents the following radicals:

and R_2 represents the radicals

in the form of an R epimer, an S epimer, or a stereoisomeric mixture of the R and S epimers in terms of the orientation of the substituents on the carbon atom at position 22, novel intermediates and a method of their preparation by hydrolysis-ketalization, and use of such compounds as drugs and/or therapeutic agents.
